

# Chromatic Modulation

## PRACTICE BOX ANSWERS

### PRACTICE BOX 25.1

Method 1

B minor: i      iv      V      i      vii<sup>⁷</sup>/iv  
E minor: vii<sup>⁷</sup>      i      V      i

Method 3

E minor: i      V      i  
F<sup>#</sup> minor: vii<sup>⁷</sup>      i      V      i<sup>⁶</sup>      ii<sup>⁶</sup>      V      VI

The fourth chord would resolve to the supertonic of E minor, which is a diminished triad. Therefore, the fourth chord cannot be analyzed in the starting key, creating a Method 3 modulation. The final cadence in F<sup>#</sup> minor is deceptive.

## PRACTICE BOX 25.1, continued

Method 2

E minor: i      V      i      VI       $V_5^6 / iv$

C major:  $V_5^6 / vi$       vi      ii       $I^6$        $V^7$       I

Method 3

$A_\flat$  major: I      V      I

$G_\flat$  major:  $V_5^6 / IV$       IV      V      I
